

A Trump card up your ... sleeve !

Received recently a series of short excerpts of Trump's now boring appearances, on separate occasions, live on screen, in loud, much gesticulated speeches, which certainly drew wide smiles and much laughter on the beholder's face.

(Following appear Trump's exact words in *Times New Roman, Bold, Italic, size 14 Fonts*, while my "interventions" linger around in Arial, normal, size 12 Fonts.)

And we go as he declares:

- *Nobody knows this stuff better than me*
- *Nobody knows more about taxes than I do... and income than I do*
- *Nobody knows more about construction than I do*
- *Nobody knows more about campaign finance than I do*
- *I know more about drones than anybody*
- *Nobody knows much more about technology, this type of technology, certainly than I do.*

All sounding like a Simple Rule of Trump.

And we go on:

- *Nobody knows more about technology than me*
- *Nobody in the history of this country has ever known so much about infrastructure.*

No.. No.. this is not Chat GPT, this is Bla.Bla DT.

- *I know the H-1B, I know the H-2B, nobody knows it better than me*
- *I know more about ISIS than the generals do, believe me.* (suddenly, he pleads for public, viewers' consent. A rare case).
- *I understand things, I comprehend very well, OK? Better than, I think* (another rare slip of hesitation), *almost anybody* (so humble).

- *And by the way, who knows the other side of the picture more than me?*
- *I know it. Nobody knows more about environmental impact statements than me* (this surely explains the reason for leaving the World Enviro convention)
- *I understand the power of Facebook, maybe better than almost anybody*
- *I know more about renewables than any human being on Earth.* (What about animals. Most probably he got a hint that ET knew more on planets Mars and Jupiter).
- *Nobody knows more about polls than me*

- *I know more about courts* (certainly you do) *than any human being on Earth* (again?...animals and Mars?)

Where on Planet Earth did the standard expression “**Anything you say will be taken down as evidence against you in court**” go? Please bring it back.

- *I know more about steel workers than anybody that’s ever run for office* (what about walked into the Oval?)

- *I know more about golf than Obama knows* (remember: Golf of Mexico... sounds familiar, disregarding the spelling).

- *Nobody knows about banks than I do.*

- *Nobody knows more about trade than me.* (ask Tariff, should now be known as TTT = Trump’s Tariff Threat or “Trade and the Trump”)

- *Well obviously, he doesn’t know about nuclear weapons. I know more about nuclear weapons than he’ll ever know.* (I presume he is talking about Oppenheimer). (Yes, this is the psychopath who has the Red Button at hand). (We are on the way to a nuked WWII)

- *I understand the tax laws better than almost anyone* (and modesty pays...taxes, this is Seeking Deep into your pockets)

- *Who knows more about lawsuits than I do?*

- *I’m the king.* (No, this is not the Almighty speaking...)

- *I know more about offense and defense* (formerly offence and defence in good old English) *than they will ever understand*

- *Nobody even understands it but me, it’s called devaluation*

- *I understand money better than anybody.* (money talks... money language).

Did I hear presumptuous?

- *I understand the system better than anybody* (poor anybody, he is getting F marks in all courses). (Still waiting for: "I know more than Siri and Alexa put together")

- *Nobody knows more about debt than I do.* (and the tax-payer to celebrate)

Sor.. Sorry, did you say Chatterbox?

The world is definitely facing a flagrant case of the **Dunning-Kruger Effect**...

...definitely.
